-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6, 7, 10-13 and 15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Eiseman US Patent No. 6,354,297.

Eiseman discloses apparatus and method for the treatment of biological tissue with electromagnetic energy, the method comprising the step of exposing the treatment area with an optical energy without causing thermal damage to the tissue, the optical energy having a dosage of greater than 20 J/cm² (see the abstract; col. 1, lines 14-20; col. 2, lines 60-63; and col. 18, lines 1-6).

With respect to claim 2, the light source of Eiseman is selected from the group consisting of UV, visible and IR light sources (see col. 10, lines 27-33; and col. 16, lines 43-64).

With respect to claim 4, see col. 18, lines 12-13. With respect to claims 6 and 7, the treatment area for removing fat tissue encompasses an area between 0.1 to 100 cm².

As to claims 12 and 13, Eiseman further teaches the use of a continuous or pulsed light source (see col. 13, line 1).

As to claim 3, although Eiseman teaches in the background section of the invention that the use of YAG laser is known in the art, he does not particularly employ an Nd:YAG laser to provide the treatment energy. However, at the time of the applicant's invention, it would have been obvious to one skilled in the art to modify Eiseman and use an Nd:YAG laser as an equivalent alternative light source to provide the treatment energy. It is known in the art that principle (first harmonic) of the Nd:YAG laser operates in the near infrared wavelength range.

Allowable Subject Matter

Claims 5, 8, 9 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ahmed M. Farah whose telephone number is (571) 272-4765. The examiner can normally be reached on Mon-Thur 9:30 AM-7:30 PM, and 9:30 AM - 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marmor II Charles can be reached on (571) 272-4730. The fax phone
